

Press Release

Electric Double Layer Capacitor

The trend towards more compact and advanced feature mobile devices was evident. Keeping this trend in mind, the demand for a Real Time Clock backup solution, that is thin, small, reliable and environmentally friendly has been increasing dramatically.

SII Micro Parts, Ltd., Pb Free Reflowable Backup Capacitors XH409H, provides an excellent solution. This product does not contain environmentally harmful material or heavy metals such as Lead, Arsenic or Cadmium.

The XH409H is rated at 3.3V and is available with a standard Tab formation: IV05E that fits most customers' specifications.

Many common applications include Mobile Phones, Digital Cameras, MP3 Players, Medical Instruments, GPS systems, POS Systems, etc.

The high capacity (0.05F) makes the device suitable for installation in restricted space applications; with dimensions of 4.8mm in diameter and 0.9 mm in height. Other notable features include a long life cycle and a wide operating temperature range of -25°C to +60°C.
